ASSET OWNER

(PURCHASE & OPEN DATA PLAN)

Infrastructure ownership and total independence for your Operations Center.

PRICING STRUCTURE

- **Hardware Acquisition (One-Time Payment):** xxx \$* **Geo-Fiber App
Subscription (Optional):** xxx\$ / month (or xxx \$ / year)

COMMERCIAL PHILOSOPHY

A strategic model for operators demanding absolute control. By purchasing the monitoring device (Edge Device) outright, you gain physical ownership of the equipment and **direct access to your network's data stream**. This allows you to integrate the readings seamlessly into your own software or NOC (Network Operations Center).

If you prefer to avoid custom software development costs, we offer licensing for our Geo-Fiber App at a highly reduced rate, with an annual payment option that maximizes financial savings.

CONDITIONS & SECURITY

- **Open Architecture & Security:** Raw data generated by the hardware is transmitted securely using encrypted REST APIs or MQTT over TLS protocols, ensuring your information cannot be intercepted.
- **Absolute Ownership (CAPEX):** The hardware belongs to the client. Future upgrades due to technological advancements are the owner's responsibility.
- **Optional Licensing:** Utilizing the Geo-Fiber cloud platform requires signing a SaaS licensing agreement exclusive to hardware owners.
